Ref. No. (9) MTCC 7/4 Vol. 2

18 July 2002

TO WHOM IT MAY CONCERN

This is to confirm that Malaysian Heveawood (Rubberwood) products of **Forestry, Timber and Environment Consult Sdn. Bhd.** are processed / manufactured from Heveawood (Rubberwood) logs harvested from rubber plantations managed through systematic planting and replanting programmes (usually on a 25-year rotation). The trees are felled when their life-span for latex production is no longer economic and replanting is necessary. In this respect, Malaysian Heveawood (Rubberwood) products are environmentally-friendly.

CHEW LYE TENG
Chief Executive Officer
